

Accucraft GS-4 Daylight

The Daylight locomotive was equipped with a diesel air horn in addition to the steam whistle. We have included this on our version of the Daylight sound. As a result, the trigger terminal assignments are different from our defaults listed in the BigSound™ handbooks. The air horn crossing toot sequence is available as a triggered sound.

There is NO coal shoveling sound, as the Daylight was auger fed.

Daylight Air Horn Trigger Assignments:

2K2:

Terminal 12: Grade crossing sequence

DCC Function 5: Grade crossing sequence

P5:

Terminal unassigned

DCC Function 5: Grade crossing sequence

PB9:

Terminal 7: Grade crossing sequence

DCC Function 5: Grade crossing sequence
